 - We plan to launch the first phase of our industrial park at Bandar Cemerlang for sales within the next three years.

 - Demand for landed medium cost residential, industrial and commercial property markets especially in Iskandar Malaysia Region and serviced apartments near the RTS terminal is expected to remain good for the next few years.
 - The Group is anticipated to be operating at optimum capacity for the next few years.
- 

STRATEGIES

STRATEGIES

- The Group will continue to focus on landed medium cost and affordable housing development.
 - To develop a wide range of properties ranging from low to medium high-cost residential properties, shop offices and from semi-detached factory to large detached factory to target a wide spectrum of customers' needs.
 - Continue to sell substantially built and completed buildings to meet demand from customers preferring to buy substantially built/completed buildings.
 - Pre-built factories for rent to industrialists. Significant demand is expected for rental market at NCIP by foreigners currently operating in higher cost areas.
 - Reduce financial gearing via sale of suitable parcels of land.
 - Focus on apartment development and sale in Johor Bahru town centre.
- 

BUSINESS OUTLOOK

- Despite the increasingly challenging business environment, the property market is expected to remain reasonably good in the next few years especially in Johor, due to the ongoing Johor Bahru-Singapore Rapid Transit System (“RTS”) Link project and Johor-Singapore Special Economic Zone (“JS-SEZ”).
 - Currently there are more than 350,000 Malaysians travelling across the Johor-Singapore Causeway daily. The 4.2 km RTS link will be the second rail link between Malaysia and Singapore upon its targeted completion date by end of 2026. The train will take 5 minutes to travel one way between Woodlands North station in Singapore and Bukit Chagar station in Johor Bahru. With such convenience in place, this ongoing RTS project will serve as a catalyst to revitalise Johor Bahru City Centre development and property developments within close vicinity to the Bukit Chagar terminal will benefit.
 - JS-JEZ, a collaborative effort between Singapore and Malaysia, aims to strengthen business ties, enhance bilateral relations, boost cross-border flow of goods and people through various government strategic initiatives.
 - The collaboration is expected to improve the business ecosystems of both nations and attract new investments.
-

BUSINESS OUTLOOK (CONT.)

- The signing of the JS-SEZ Definitive Agreement was completed on 7 January 2025. Several initiatives aimed at enhancing movement of people, goods and services as well as financial infrastructure are underway.
 - With the continued influx of foreign direct investments to Johor, demands for industrial properties remain strong and are expected to grow in the coming years especially with the special tax rates for investors in JS-SEZ.
 - As the JS-SEZ is expected to create more economic activities and job opportunities in the nine flagship areas in JS-SEZ, it would attract larger population and drive demand for all types of properties within JS-SEZ.
 - The intensifying international trade tensions and uncertainty on global economic outlook brought about by the reciprocal tariffs imposed by the United States will continue to lead to fluctuating material costs and currency volatility. The minimum wages adjustment and subsidy rationalization are also expected to have an impact on our cost. We will continue to monitor the market situation and develop properties that meet market needs.
